

1. "The adoption of the mamluk* institutions by the Abbasids was followed almost immediately by [the] . . . disintegration of the state. . . . The disintegration of the Abbasid state was an intensely painful process in which it seemed at times as if the very venture of Islam was coming to an end, like that of Alexander the Great before it. . . . Indeed, that Islam was soon to disappear was the very premise upon which the [Shi'ite] revolutionaries held out their promise of a moral and material recovery: nothing less . . . could now save the marriage between religion and power to which the Islamic [state] owed its existence."

*an Arabic term designating an enslaved person, in this case, a slave soldier of Turkic origin

Patricia Crone, Danish-American historian of Islamic history, *Slaves on Horses: The Evolution of the Islamic Polity*, 1980

The disintegration of the Abbasid Caliphate most directly led to which of the following political developments in the Islamic world in the thirteenth century?

- A) The Russian conquest of Central Asia
- B) The rise of Turkic states
- C) The conversion of most of the Islamic world to Shi'a Islam
- D) The collapse of trade along the Silk Road networks

B) The rise of Turkic states

Correct. The disintegration of the Abbasid state resulted in the emergence of numerous Islamic states controlled by Turkic peoples. Long before the collapse of the Abbasid Caliphate in 1258, the Islamic world split into a number of smaller successor states, most of which were dominated by Turkic ruling classes. In the thirteenth century, some examples of such states included the Delhi Sultanate of India and the Mamluk Sultanate of Egypt.

2. "The adoption of the mamluk* institutions by the Abbasids was followed almost immediately by [the] . . . disintegration of the state. . . . The disintegration of the Abbasid state was an intensely painful process in which it seemed at times as if the very venture of

B) The activities of Sufi missionaries

Correct. The activities of Sufi missionaries were the

Patricia Crone, Danish-American historian of Islamic history, *Slaves on Horses: The Evolution of the Islamic Polity*, 1980

Despite the disintegration of the Abbasid Caliphate, Islam continued to spread across Afro-Eurasia in the period 1200-1450 primarily because of which of the following?

- A) The conquest of the Christian Crusader States in the Levant
- B) The activities of Sufi missionaries
- C) The voyages of the Muslim eunuch Zheng He
- D) The translation activities of Muslim scholars

largest factor in the further spread of Islam across Afro-Eurasia in the period 1200-1450, as Sufis won new converts in places such as Anatolia, Central Asia, India, and Southeast Asia where Islam had already been introduced.

3. "The adoption of the mamluk* institutions by the Abbasids was followed almost immediately by [the] . . . disintegration of the state. . . . The disintegration of the Abbasid state was an intensely painful process in which it seemed at times as if the very venture of Islam was coming to an end, like that of Alexander the Great before it. . . . Indeed, that Islam was soon to disappear was the very premise upon which the [Shi'ite] revolutionaries held out their promise of a

D) The Abbasid state was headed by a caliph who was both the state's supreme religious and political leader.

Correct. In the Abbasid caliphate, the caliph held supreme religious and political authority, which best

moral and material recovery: nothing less . . . could now save the marriage between religion and power to which the Islamic [state] owed its existence."

*an Arabic term designating an enslaved person, in this case, a slave soldier of Turkic origin

Patricia Crone, Danish-American historian of Islamic history, *Slaves on Horses: The Evolution of the Islamic Polity*, 1980

illustrates the Abbasid concept of governance regarding religion and political power.

The combination between religious and political aspects in the Abbasid state's concept of governance is best reflected in which of the following?

- A) The Abbasid state had an influential Sunni religious class that often came into conflict with the state.
- B) The Abbasid state often allowed local rulers considerable autonomy.
- C) The Abbasid state patronized the construction of religious buildings such as mosques.
- D) The Abbasid state was headed by a caliph who was both the state's supreme religious and political leader.

4. "I, the reverend Buddhist teacher Dharmasekhara, dedicated this statue of the bodhisattva Amoghapasa* on the orders of His Majesty King Adityawarman, for the benefit and salvation and happiness of all creatures.

Hail to the King—experienced in the arts of war, well versed in the sciences, he is an ocean of all virtues practiced by the followers of the Buddha! He is free from all physical desire. Hail to the King—he who

C) Statues of Buddhist divine figures could spiritually benefit everyone.

Correct. The first paragraph of the inscription states that a statue of a bodhisattva was dedicated "for the benefit

supports the entire world. He has collected jewels by the millions, taken them from the hands of his enemies among the other rulers of this world. He who is like God among kings, crowned, protected by heavenly beings, King of kings! He orders what should be known to all!"

Sanskrit inscription on a statue of a bodhisattva produced in the Malayapura kingdom, Sumatra, Indonesia, circa 1350 c.e.

*a major figure worshipped in Mahayana Buddhism

and salvation and happiness of all creatures."

Which of the following best describes a claim made in the first paragraph of the inscription?

- A) King Adityawarman was a bodhisattva.
- B) King Adityawarman was a Buddhist teacher.
- C) Statues of Buddhist divine figures could spiritually benefit everyone.
- D) Statues of Buddhist teachers were revered by rulers and common people.

5. "I, the reverend Buddhist teacher Dharmasekhara, dedicated this statue of the bodhisattva Amoghapasa* on the orders of His Majesty King Adityawarman, for the benefit and salvation and happiness of all creatures.

Hail to the King—experienced in the arts of war, well versed in the sciences, he is an ocean of all virtues practiced by the followers of the Buddha! He is free from all physical desire. Hail to the King—he who supports the entire world. He has collected jewels by the millions, taken them from the hands of his enemies among the other rulers of this world. He

B) in Vedic religions, rejecting worldly concerns in order to attain spiritual perfection was considered a virtue.

Correct. Being free of physical desires in order to concentrate on spiritual pursuits is a key belief of Vedic religions such as Buddhism and Hinduism. The fact that the passage refers to the king

who is like God among kings, crowned, protected by heavenly beings, King of kings! He orders what should be known to all!"

Sanskrit inscription on a statue of a bodhisattva produced in the Malayapura kingdom, Sumatra, Indonesia, circa 1350 c.e.

*a major figure worshipped in Mahayana Buddhism

The claim in the second paragraph that the king has become "free from all physical desire" can best be understood to mean that

- A) Southeast Asian states' ruling elites were very wealthy.
- B) in Vedic religions, rejecting worldly concerns in order to attain spiritual perfection was considered a virtue.
- C) Buddhist monks and nuns in Southeast Asian societies were required to maintain an ascetic lifestyle.
- D) Hindus believed that members of each caste had different rights and responsibilities.

as being free from all physical desire in the context of praising him for dedicating a statue to a bodhisattva and of being "an ocean of all virtues practiced by the followers of the Buddha" indicates that the phrase is used in this religious sense of the phrase.

6. "I, the reverend Buddhist teacher Dharmasekhara, dedicated this statue of the bodhisattva Amoghapasa* on the orders of His Majesty King Adityawarman, for the benefit and salvation and happiness of all creatures.

Hail to the King—experienced in the arts of war, well versed in the sciences, he is an ocean of all virtues practiced by the followers of the Buddha! He is free from all physical desire. Hail to the King—he who supports the entire world. He has collected jewels by the millions, taken them from the hands of his

A) His spiritual attributes and worldly achievements made him a powerful and legitimate ruler.

Correct. The second paragraph of the inscription focuses on the king's spiritual attributes and worldly achievements in order to

enemies among the other rulers of this world. He who is like God among kings, crowned, protected by heavenly beings, King of kings! He orders what should be known to all!"

Sanskrit inscription on a statue of a bodhisattva produced in the Malayapura kingdom, Sumatra, Indonesia, circa 1350 c.e.

*a major figure worshipped in Mahayana Buddhism

demonstrate his power and legitimacy.

Which of the following is an argument in the second paragraph of the inscription regarding King Adityawarman?

- A) His spiritual attributes and worldly achievements made him a powerful and legitimate ruler.
- B) His attention to the welfare of all of his subjects made him a caring and legitimate ruler.
- C) His conquest of all of the surrounding kingdoms in Indonesia made him a legitimate ruler.
- D) His knowledge of science and ships in an island kingdom made him an effective and legitimate ruler.

7. "One of the most important aspects of the Maya economy was the exchange of exotic goods. Maya rulers and elites needed such goods to maintain and reinforce their social status and power. Many of these goods were used in the formal dress of kings, nobles, and priests. Without them, the elites could not carry out the rituals that were their principal duties in the eyes of the people. Jaguar pelts, fine textiles, feathers, and other such products were exchanged over long distances within the Maya lowlands. . . . Such items were probably exchanged as dowry, gifts

A) Exotic goods were exchanged over long distances within the Maya lowlands.

Correct. Demarest claims that exotic goods such as jaguar pelts, textiles, and feathers were exchanged over long distances within the Maya lowlands, thus illustrating the importance of

at royal marriages, coronations, funerals, or at religious pilgrimages. Exotic goods were also probably given as tribute to rulers by their vassals.

These high-status goods held together the Maya world and unified patterns of behavior in religion, science, and warfare. Their exchange surely went hand in hand with exchanges of information, including scientific knowledge, early writing, and, most importantly, models of political organization."

Arthur Demarest, United States anthropologist, *Ancient Maya: The Rise and Fall of a Rainforest Civilization*, 2004

exotic goods to the economy of the wider Maya region.

Which of the following pieces of evidence most strongly supports the author's conclusion about the importance of exotic goods to the Maya region's economy?

- A) Exotic goods were exchanged over long distances within the Maya lowlands.
- B) Exotic goods were traded between the Maya city-states and neighboring states.
- C) The exchange of exotic goods went hand in hand with the exchange of information.
- D) The Maya region depended on the trade in exotic goods because of relatively low levels of agricultural production.

8. "One of the most important aspects of the Maya economy was the exchange of exotic goods. Maya rulers and elites needed such goods to maintain and reinforce their social status and power. Many of these goods were used in the formal dress of kings, nobles,

B) prohibited nobles and priests from wearing certain types of exotic goods reserved for rulers

and priests. Without them, the elites could not carry out the rituals that were their principal duties in the eyes of the people. Jaguar pelts, fine textiles, feathers, and other such products were exchanged over long distances within the Maya lowlands. . . .

Such items were probably exchanged as dowry, gifts at royal marriages, coronations, funerals, or at religious pilgrimages. Exotic goods were also probably given as tribute to rulers by their vassals.

These high-status goods held together the Maya world and unified patterns of behavior in religion, science, and warfare. Their exchange surely went hand in hand with exchanges of information, including scientific knowledge, early writing, and, most importantly, models of political organization."

Arthur Demarest, United States anthropologist, *Ancient Maya: The Rise and Fall of a Rainforest Civilization*, 2004

The author directly uses all of the following pieces of evidence to support his argument about the relationship between exotic goods and the power of Maya rulers EXCEPT that Maya rulers

- A) used exotic goods to carry out rituals that their subjects expected them to perform
- B) prohibited nobles and priests from wearing certain types of exotic goods reserved for rulers
- C) used exotic goods in royal coronations
- D) received exotic goods as tribute payments from vassals

Correct. Demarest does not state in the passage that Maya rulers prohibited nobles and priests from wearing certain types of exotic goods.

"One of the most important aspects of the Maya economy was the exchange of exotic goods. Maya rulers and elites needed such goods to maintain and reinforce their social status and power. Many of these goods were used in the formal dress of kings, nobles, and priests. Without them, the elites could not carry out the rituals that were their principal duties in the eyes of the people. Jaguar pelts, fine textiles, feathers, and other such products were exchanged over long distances within the Maya lowlands. . . .

Such items were probably exchanged as dowry, gifts at royal marriages, coronations, funerals, or at religious pilgrimages. Exotic goods were also probably given as tribute to rulers by their vassals.

These high-status goods held together the Maya world and unified patterns of behavior in religion, science, and warfare. Their exchange surely went hand in hand with exchanges of information, including scientific knowledge, early writing, and, most importantly, models of political organization."

Arthur Demarest, United States anthropologist, *Ancient Maya: The Rise and Fall of a Rainforest Civilization*, 2004

Which of the following does the author cite most directly to support his argument in the third paragraph about the importance of exotic goods in the Maya region?

- A) The existence of sophisticated astronomical tables
- B) The emergence of a unified Maya kingdom based on new political models

D) The existence of unified patterns of behavior in warfare, science, and religion

Correct. Demarest argues that the exchange of exotic (or "high-status") goods in the Maya region led to the development of unified patterns of behavior in religion, science, and warfare.

- C) The emergence of new systems of writing based on earlier Mesoamerican systems
- D) The existence of unified patterns of behavior in warfare, science, and religion

10. "In that year [1450 c.e.] there came to Naples a three-man embassy from the King of Ethiopia to His Highness, our King Alfonso. Among the ambassadors was a certain Pietro Rombulo, an Italian, native of the city of Messina. This Pietro claimed that he had lived among the Ethiopians for over 40 years. And he described to me how in Ethiopia there are innumerable Christians—since both the people and the king there worship Christ—among whom he had been able to live a good Christian life safely and honorably. The ruler of Ethiopia, King David, whom they call Zara Yacob, was said by the ambassadors to be the most civilized, the most just, and the most pious of princes."

Pietro Ranzano, Catholic Church official in Naples and Sicily, universal history written circa 1480

Which of the following was a continuity in the development of African states in the period circa 1200-1450 ?

- A) African states such as Ethiopia maintained close contacts with South and East Asian states across the Indian Ocean but rarely had contacts with Europe.
- B) Despite geographical barriers, some African states were able to maintain diplomatic and cultural contacts with the broader Afro-Eurasian world.
- C) Most African states rejected traditional forms of

B) Despite geographical barriers, some African states were able to maintain diplomatic and cultural contacts with the broader Afro-Eurasian world.

Correct. Despite the barrier of the Sahara desert, African states such as Ethiopia and the states of the Sahel (Ghana, Mali, Songhai, etc.) were able to maintain regular diplomatic and cultural contacts with states in North Africa, Mediterranean Europe, and Muslim Southwest Asia.

international diplomacy, such as dynastic marriages and tribute payments.

D) African states needed to maintain friendly diplomatic relations with Europe in order to expand their empires.

11. "In that year [1450 c.e.] there came to Naples a three-man embassy from the King of Ethiopia to His Highness, our King Alfonso. Among the ambassadors was a certain Pietro Rombulo, an Italian, native of the city of Messina. This Pietro claimed that he had lived among the Ethiopians for over 40 years. And he described to me how in Ethiopia there are innumerable Christians—since both the people and the king there worship Christ—among whom he had been able to live a good Christian life safely and honorably. The ruler of Ethiopia, King David, whom they call Zara Yacob, was said by the ambassadors to be the most civilized, the most just, and the most pious of princes."

Pietro Ranzano, Catholic Church official in Naples and Sicily, universal history written circa 1480

Which of the following continuities in the development of African states in the period circa 1200-1450 most likely explains the prevalence of Christianity in Ethiopia?

- A) Some African states' religious traditions continued to be influenced by cultural transfers dating back to earlier centuries.
- B) Some African states were famous for their religious toleration and for allowing multiple religious

A) Some African states' religious traditions continued to be influenced by cultural transfers dating back to earlier centuries.

Correct. Ethiopia provides a good example of a cultural continuity—Christianity—being used as the basis for state building in Africa. Christianity became widespread among the Ethiopian population and was adopted by Ethiopian political elites as early as the fourth century c.e. Similar examples of a cultural continuity influencing the development of African states would be the influence of Islam in West African states such as Ghana and Mali and in the Swahili states of East Africa in the period 1200-1450. Islam had been introduced to those

traditions to coexist in their territories.

C) African states' official religions were typically syncretic mixtures of several different religious traditions.

D) While African populations mostly continued to adhere to indigenous polytheistic religions, African political elites often adopted monotheistic religions such as Christianity and Islam.

regions centuries earlier as well.

12. "In that year [1450 c.e.] there came to Naples a three-man embassy from the King of Ethiopia to His Highness, our King Alfonso. Among the ambassadors was a certain Pietro Rombulo, an Italian, native of the city of Messina. This Pietro claimed that he had lived among the Ethiopians for over 40 years. And he described to me how in Ethiopia there are innumerable Christians—since both the people and the king there worship Christ—among whom he had been able to live a good Christian life safely and honorably. The ruler of Ethiopia, King David, whom they call Zara Yacob, was said by the ambassadors to be the most civilized, the most just, and the most pious of princes."

Pietro Ranzano, Catholic Church official in Naples and Sicily, universal history written circa 1480

B) They used religion and laws to bolster their legitimacy.

Correct. Like virtually all rulers throughout history, African rulers invoked both religious claims and their role as lawgivers or law enforcers to bolster their political legitimacy. For example, the ambassadors' description of King Zara Yacob indicates that he sought to project and advertise his power in these terms as well.

Which of the following was a key similarity in the policies of the rulers of African states such as Ethiopia in the period circa 1200-1450 ?

A) They granted their subjects unrestricted freedom of speech.

B) They used religion and laws to bolster their legiti-

macy.

C) They faced challenges to their power from powerful merchant elites.

D) They sought to achieve economic self-sufficiency by restricting trade contacts with other societies.

13. "I, Edward, by the grace of God king of England, sent this decree to the reverend father in Christ William, by the grace of God archbishop of Canterbury, supreme Church leader of all England:
Know that, because of the great number of people who died in the recent pestilence, those who survive see that masters need servants, which have become scarce, and so they now refuse to serve as workmen unless they receive excessive wages.
That is why, I, considering the grave inconveniences that might come from the lack of such workmen, especially plowmen, and after consultations with the nobles and clergy of the realm, have decided that every man and woman of our realm of England shall be required to serve his or her lord at the wages that were provided five years ago, in the year 1346.
The lords are entitled to keep their serfs. If any such serf, man or woman, who is required to serve their lord will not do so, they shall be immediately committed to jail."
King Edward III of England, the Statute of Laborers, royal decree, 1351

C) The deep influence of Christianity on medieval society and culture

Correct. Phrases such as "by the grace of God" and "reverend father in Christ" reflect the deep religiosity of medieval society and political culture.

The terminology used in the opening sentence of the decree was most directly influenced by which of the following?

- A) The notion that the Pope is the supreme leader of the Church
- B) The medieval rules of chivalry and courtly etiquette
- C) The deep influence of Christianity on medieval society and culture
- D) The slow and uncertain nature of communications in medieval Europe

14. "I, Edward, by the grace of God king of England, sent this decree to the reverend father in Christ William, by the grace of God archbishop of Canterbury, supreme Church leader of all England:

Know that, because of the great number of people who died in the recent pestilence, those who survive see that masters need servants, which have become scarce, and so they now refuse to serve as workmen unless they receive excessive wages.

That is why, I, considering the grave inconveniences that might come from the lack of such workmen, especially plowmen, and after consultations with the nobles and clergy of the realm, have decided that every man and woman of our realm of England shall be required to serve his or her lord at the wages that were provided five years ago, in the year 1346.

The lords are entitled to keep their serfs. If any such serf, man or woman, who is required to serve their lord will not do so, they shall be immediately committed to jail."

King Edward III of England, the Statute of Laborers, royal decree, 1351

B) The fragmented, decentralized nature of European feudal monarchies

Correct. Like most European states at the time, the English monarchy had to contend with the power of an entrenched hereditary nobility and a semiautonomous clerical establishment. While the monarch's power was absolute in theory, in practice he or she often needed to wield it in cooperation or consultation with the aristocracy and the clergy.

The process of "consultations with the nobles and clergy of the realm" in the making of Edward III's decree best reflects which of the following?

- A) The emergence of the concept that parliaments, rather than kings, had ultimate political authority in European states
- B) The fragmented, decentralized nature of European feudal monarchies
- C) The legacy of Roman imperial political traditions on medieval European states
- D) European rulers' practice of making harsh legislation more palatable by claiming it was part of God's will

15. "I, Edward, by the grace of God king of England, sent this decree to the reverend father in Christ William, by the grace of God archbishop of Canterbury, supreme Church leader of all England:

Know that, because of the great number of people who died in the recent pestilence, those who survive see that masters need servants, which have become scarce, and so they now refuse to serve as workmen unless they receive excessive wages.

That is why, I, considering the grave inconveniences that might come from the lack of such workmen, especially plowmen, and after consultations with the nobles and clergy of the realm, have decided that every man and woman of our realm of England shall be required to serve his or her lord at the wages that were provided five years ago, in the year 1346.

The lords are entitled to keep their serfs. If any such serf, man or woman, who is required to serve their

A) the agrarian nature of medieval European economies and their reliance on coerced labor

Correct. The sense of urgency behind the labor shortages of agricultural workers, particularly plowmen, reflects the agrarian nature of medieval economies, and the mention of serfs reflects the reliance of medieval economies on coerced labor.

lord will not do so, they shall be immediately committed to jail."

King Edward III of England, the Statute of Laborers, royal decree, 1351

The need for legal action to address the "grave inconveniences" that might result from the labor shortages described in the passage most likely resulted from

- A) the agrarian nature of medieval European economies and their reliance on coerced labor
- B) the inability of members of the nobility and other feudal lords to take direct legal action against their workers and serfs
- C) the high social rank and economic standing of plowmen in medieval English society
- D) the presence of guild regulations prohibiting agricultural laborers from working more than a certain number of hours each week

16. "One of the things that struck me most in Peru was its great, splendid highways, and I wondered how many men it must have required to build them and what tools and instruments were used to level the mountains and cut through the rock to make them as broad and good as they are. It seems to me that if the king of Spain wanted to build a highway from Quito to Cuzco, I do not think that he could do it even with all of his power unless he followed the method that the Inca employed.
- When an Inca king decided to build one of these highways, all he needed to do was give the command.
- B) They were very broad, and some extended across the entire kingdom.
- Correct. In the passage, de León remarks many times that the highways were very broad, and he notes in the second paragraph that they extended "from one boundary of the kingdom to the other."

Then, the inspectors would go through the provinces, laying out the highway's route and assigning Indians to help build the road. In this way, the road was built in a short time from one boundary of the kingdom to the other. The Inca rulers built many of these roads and were so full of pride that when one ruler died, his heir would build his road larger and broader if he intended to set out on a conquest."

Pedro Cieza de León, Spanish soldier and historian, *Chronicles of Peru*, 1553

Which of the following pieces of evidence most strongly supports the author's arguments about the quality of the highways described in the passage?

- A) They were built by men with tools.
- B) They were very broad, and some extended across the entire kingdom.
- C) There were many roads throughout the kingdom.
- D) Their construction was supervised by government officials.

17. "One of the things that struck me most in Peru was its great, splendid highways, and I wondered how many men it must have required to build them and what tools and instruments were used to level the mountains and cut through the rock to make them as broad and good as they are. It seems to me that if the king of Spain wanted to build a highway from Quito to Cuzco, I do not think that he could do it even with all of his power unless he followed the method that the Inca employed.
- When an Inca king decided to build one of these high-

B) The Inca rulers only had to command their officials to construct a highway, and it was completed quickly.

Correct. De León indicates in the passage that the king of Spain could construct a highway from Quito to Cuzco only if he followed the Incas' method of construction be-

ways, all he needed to do was give the command. Then, the inspectors would go through the provinces, laying out the highway's route and assigning Indians to help build the road. In this way, the road was built in a short time from one boundary of the kingdom to the other. The Inca rulers built many of these roads and were so full of pride that when one ruler died, his heir would build his road larger and broader if he intended to set out on a conquest."

Pedro Cieza de León, Spanish soldier and historian, *Chronicles of Peru*, 1553

cause Inca rulers would only have to command their officials to build the highway, and those officials would have the road surveyed, recruit workers, and complete it very quickly.

Which of the following pieces of evidence does the author most directly use to support his argument about the king of Spain following the Inca method of highway construction?

- A) the Inca rulers constructed roads to help complete conquests.
- B) The Inca rulers only had to command their officials to construct a highway, and it was completed quickly.
- C) The Inca rulers clearly marked their kingdom with boundaries.
- D) The Inca rulers could acquire specialized tools to cut through mountains.

18. "One of the things that struck me most in Peru was its great, splendid highways, and I wondered how many men it must have required to build them and what tools and instruments were used to level the mountains and cut through the rock to make them as broad and good as they are. It seems to me that
- D) Inca rulers typically tried to construct bigger and broader highways than their predecessors if they wanted to undertake conquests.

if the king of Spain wanted to build a highway from Quito to Cuzco, I do not think that he could do it even with all of his power unless he followed the method that the Inca employed.

When an Inca king decided to build one of these highways, all he needed to do was give the command.

Then, the inspectors would go through the provinces, laying out the highway's route and assigning Indians to help build the road. In this way, the road was built in a short time from one boundary of the kingdom to the other. The Inca rulers built many of these roads and were so full of pride that when one ruler died, his heir would build his road larger and broader if he intended to set out on a conquest."

Pedro Cieza de León, Spanish soldier and historian, *Chronicles of Peru*, 1553

Correct. De León states that Inca rulers were so full of pride that a ruler would try to build bigger and larger roads than those of his predecessors when setting out on a military campaign of conquest.

Which of the following pieces of evidence does the author use to support his argument about the pride of Inca rulers in the second paragraph?

- A) Inca rulers followed the method of dynastic succession for passing political authority from one ruler to another.
- B) Inca rulers performed religious ceremonies to bless the highways and those who traveled on them.
- C) Inca rulers had officials assign men from the provinces to construct the highways.
- D) Inca rulers typically tried to construct bigger and broader highways than their predecessors if they wanted to undertake conquests.

"The East African coast was certainly known to the people of Arabia by the eighth century b.c.e. In fact, the ancient Southern Arabian state of Ausan traded extensively there and may have actually held a portion of the coast. Traders who reached the coast discovered a number of potentially valuable raw materials there. Among these were spices, tortoise shell, coconut oil, ivory, and later, gold and slaves.

It was not until almost 1000 c.e., however, that the first important commercial city-states emerged along the coast. These city-states fluctuated in wealth and prestige as they competed for coastal hegemony. Because of their way of life, they tended to have a broad regional perspective. Their destinies and fortunes were at least partly determined in distant lands by foreign merchants and rulers.

Information on early political aspects of East African states remains very limited. We know that they had kings or sultans, who wielded a good deal of power. Sultans were advised by councils of princes, elders, and members of the ruling household. It seems probable that the sultan and his close relatives controlled the religious and military offices of the state."

Terry H. Elkiss, historian, "Kilwa Kisiwani: The Rise of an East African City-State," article published in *African Studies Review*, a scholarly journal, 1973.

The example of an ancient Arabian state that traded extensively and controlled territories on the East African coast can best be used as evidence of

A) the contributions of East Africa to the development of Eurasian religions

B) the long-term continuities in state building in coastal East Africa

Correct. The location and proximity of East Africa to ocean access, granting it favorable means of trade, and to neighboring city-states, gave it continued opportunities for development.

- B) the long-term continuities in state building in coastal East Africa
- C) the importance of the East African coast in the development of African national identities
- D) the technological and logistical challenges faced by Eurasian merchants trying to reach the East African coast

20. "The East African coast was certainly known to the people of Arabia by the eighth century b.c.e. In fact, the ancient Southern Arabian state of Ausan traded extensively there and may have actually held a portion of the coast. Traders who reached the coast discovered a number of potentially valuable raw materials there. Among these were spices, tortoise shell, coconut oil, ivory, and later, gold and slaves. It was not until almost 1000 c.e., however, that the first important commercial city-states emerged along the coast. These city-states fluctuated in wealth and prestige as they competed for coastal hegemony. Because of their way of life, they tended to have a broad regional perspective. Their destinies and fortunes were at least partly determined in distant lands by foreign merchants and rulers. Information on early political aspects of East African states remains very limited. We know that they had kings or sultans, who wielded a good deal of power. Sultans were advised by councils of princes, elders, and members of the ruling household. It seems probable that the sultan and his close relatives controlled the religious and military offices of the state." Terry H. Elkiss, historian, "Kilwa Kisiwani: The Rise

C) Long-distance trade

Correct. Long-distance trade in luxury goods as well as in slaves had long been the basis for the particular inter-regional connections established by East African coastal states, such as Kilwa.

of an East African City-State," article published in African Studies Review, a scholarly journal, 1973.

The interregional connections of states such as those on the East African coast can best be used as an illustration of the continued importance of which of the following?

- A) International diplomacy
- B) Polytheistic religions
- C) Long-distance trade
- D) Patriarchal gender norms

21. "The East African coast was certainly known to the people of Arabia by the eighth century b.c.e. In fact, the ancient Southern Arabian state of Ausan traded extensively there and may have actually held a portion of the coast. Traders who reached the coast discovered a number of potentially valuable raw materials there. Among these were spices, tortoise shell, coconut oil, ivory, and later, gold and slaves. It was not until almost 1000 c.e., however, that the first important commercial city-states emerged along the coast. These city-states fluctuated in wealth and prestige as they competed for coastal hegemony. Because of their way of life, they tended to have a broad regional perspective. Their destinies and fortunes were at least partly determined in distant lands by foreign merchants and rulers. Information on early political aspects of East African states remains very limited. We know that they had kings or sultans, who wielded a good deal of power. Sultans were advised by councils of princes, elders,

B) the influence of indigenous African political practices

Correct. The limited extent of the centralization of power in the person of the ruler and the continued importance of councils of elders and members of the ruler's extended household in political decision-making are characteristic features of indigenous African political practices.

and members of the ruling household. It seems probable that the sultan and his close relatives controlled the religious and military offices of the state."

Terry H. Elkiss, historian, "Kilwa Kisiwani: The Rise of an East African City-State," article published in *African Studies Review*, a scholarly journal, 1973.

The coexistence of rulers and councils of elders in African states in the period circa 1200-1450 best demonstrates

- A) an attempt to imitate the feudal governments of European states and East Asian empires
- B) the influence of indigenous African political practices
- C) an adaptation to the climatic conditions of the East African coast
- D) a reflection of the hardships and uncertainties faced by Muslim seaborne traders

22. MARIA, COUNTESS OF BÉARN,* ACCOMPANIED BY SEVEN OF HER MALE COURTIERs, SWEARS HOMAGE TO HER OVERLORD, KING ALFONSO II OF ARAGON, ILLUSTRATION IN A MANUSCRIPT PRODUCED FOR THE ROYAL COURT OF ARAGON CIRCA 1175 C.E.

*The lordship of Béarn was located in present-day southwestern France.

The act of the countess of Béarn in the image is most closely identified with which of the following political systems?

- A) Manorialism
- B) Serfdom

D) Feudalism

Correct. The image shows the countess of Béarn kneeling before her lord Alfonso II of Aragon and performing homage to him. The act of homage shown in the image was associated with feudalism, a political system that established a relationship between lord and vassal through which a lord provid-

- C) Monasticism
- D) Feudalism

ed protection to his or her vassal in exchange for the vassal providing military service and other obligations to the lord.

23. MARIA, COUNTESS OF BÉARN,* ACCOMPANIED BY SEVEN OF HER MALE COURTIER, SWEARS HOMAGE TO HER OVERLORD, KING ALFONSO II OF ARAGON, ILLUSTRATION IN A MANUSCRIPT PRODUCED FOR THE ROYAL COURT OF ARAGON CIRCA 1175 C.E.

*The lordship of Béarn was located in present-day southwestern France.

The image most directly illustrates which of the following features of the political development of medieval Europe?

- A) Its bureaucratization, as European rulers developed sophisticated systems of record keeping to strengthen their authority.
- B) Its decentralization, as European rulers frequently delegated authority to local subordinates.
- C) Its reliance on Roman traditions, as European rulers used ancient customs to demonstrate their legitimacy.
- D) Its ethnic and cultural diversity, as European rulers

B) Its decentralization, as European rulers frequently delegated authority to local subordinates.

Correct. The image shows Alfonso II of Aragon accepting the homage of the countess of Béarn and delegating the right to rule Béarn directly to her.

granted ethnic and religious groups the right to use their own laws and traditions.

24. MARIA, COUNTESS OF BÉARN,* ACCOMPANIED BY SEVEN OF HER MALE COURTIER, SWEARS HOMAGE TO HER OVERLORD, KING ALFONSO II OF ARAGON, ILLUSTRATION IN A MANUSCRIPT PRODUCED FOR THE ROYAL COURT OF ARAGON CIRCA 1175 C.E. Archivo de la Corona de Aragon, Barcelona, Spain Mithra-Index/Bridgeman Images.

*The lordship of Béarn was located in present-day southwestern France.

In Europe, political relationships of the type depicted in the image emerged most directly on account of which of the following developments?

- A) Local elites' need for military protection from more powerful lords
- B) Local elites' desire to expand the commercial power of local towns
- C) Local elites' need for military assistance to eliminate religious heresies
- D) Local elites' desire to attract new settlers to their territories

A) Local elites' need for military protection from more powerful lords

Correct. Feudal relationships emerged as the direct result of local nobles seeking to obtain protection from more powerful lords who would defend their subordinates' territory in exchange for the subordinate lord demonstrating submission and fulfilling various other obligations.

25. "O King! The city of Madurai was famed for its sweet beauty, but has now become the city of wild animals since the Muslims conquered it [in 1335]. Its famed Hindu temple has been reduced to rubble. The mighty Kaveri River used to flow in its proper channels because our noble Hindu rulers of the past had curbed it with dams. But now, the river flows without discipline like her new Muslim lords because

A) Hindu rulers had constructed irrigation works to control the Kaveri River.

Correct. The petitioner claims that Hindu rulers had constructed dams to control the Kaveri River.

the dams have been damaged beyond repair.

My Lord, it is hard to say whether we get more troubled by hearing the owls that now live in our abandoned gardens, or get more perturbed by the Persian language uttered by the pet-parrots from the houses of the Muslims. There is no agriculture left, as the angry Lord Indra* has stopped sending rains. My King! The Vedas have disappeared. With dharma gone, character and nobleness have disappeared. My king, this sword that you hold is now placed into your lotus-hands by divine providence. Take it and without further delay uproot from my lands this Muslim kingdom. Go forth my dear Lord, win your victory, and establish One Hundred Victory Pillars!"

*the Hindu god of the heavens who brings thunder and rain

Speech of a female petitioner from the South Indian city of Madurai made at the court of the king of Vijayanagara, a Hindu empire in South India. The speech is recorded in a fourteenth-century poem written by a princess of Vijayanagara describing Vijayanagara's conquest of the Muslim sultanate of Madurai in 1378.

Which of the following best describes a claim made in the first paragraph?

- A) Hindu rulers had constructed irrigation works to control the Kaveri River.
- B) Wild animals destroyed Madurai's Hindu temple.
- C) The Kaveri River flooded and destroyed the city of Madurai.

D) The city of Madurai's Hindu temple was renowned for its beauty.

26. "O King! The city of Madurai was famed for its sweet beauty, but has now become the city of wild animals since the Muslims conquered it [in 1335]. Its famed Hindu temple has been reduced to rubble. The mighty Kaveri River used to flow in its proper channels because our noble Hindu rulers of the past had curbed it with dams. But now, the river flows without discipline like her new Muslim lords because the dams have been damaged beyond repair. My Lord, it is hard to say whether we get more troubled by hearing the owls that now live in our abandoned gardens, or get more perturbed by the Persian language uttered by the pet-parrots from the houses of the Muslims. B) The absence of dharma has caused nobleness and character to disappear.

Correct. The petitioner claims that the absence of dharma has caused character and nobleness to disappear. In a Hindu context, dharma is an organizing principle of the universe that governs the rules of human society. By claiming that the absence of dharma has caused character and nobleness to disappear, the petitioner is asserting that the Hindu social order has decayed and is threatened by the continuing dominance of Muslim invaders.

Jayanagara's conquest of the Muslim sultanate of Madurai in 1378.

A historian would most likely cite which of the following claims made in the second paragraph to demonstrate that Hindu teachings influenced the development of South Asian societies?

- A) There is no agriculture left because Indra now supports the Muslims.
- B) The absence of dharma has caused nobleness and character to disappear.
- C) The Hindu citizens of Madurai are perturbed by hearing parrots speaking Persian.
- D) The Hindu citizens of Madurai protect the owls in their gardens because they are considered to be sacred birds.

27. "O King! The city of Madurai was famed for its sweet beauty, but has now become the city of wild animals since the Muslims conquered it [in 1335]. Its famed Hindu temple has been reduced to rubble. The mighty Kaveri River used to flow in its proper channels because our noble Hindu rulers of the past had curbed it with dams. But now, the river flows without discipline like her new Muslim lords because the dams have been damaged beyond repair. - B) The king has the support of the gods in his efforts to drive Muslims out of Madurai.
- Correct. The petitioner's claim that "divine providence" directly placed a sword into the king's hand is intended to demonstrate that the king of Vijayanagara was favored by divine forces. Since the petitioner's speech is included in a poem written by a princess at the court of Vijayanagara

gone, character and nobleness have disappeared. My king, this sword that you hold is now placed into your lotus-hands by divine providence. Take it and without further delay uproot from my lands this Muslim kingdom. Go forth my dear Lord, win your victory, and establish One Hundred Victory Pillars!"

*the Hindu god of the heavens who brings thunder and rain

Speech of a female petitioner from the South Indian city of Madurai made at the court of the king of Vijayanagara, a Hindu empire in South India. The speech is recorded in a fourteenth-century poem written by a princess of Vijayanagara describing Vijayanagara's conquest of the Muslim sultanate of Madurai in 1378.

Which of the following is a claim made by the petitioner in the third paragraph?

- A) The gods will directly accompany the king in his conquest of the Madurai Sultanate.
- B) The king has the support of the gods in his efforts to drive Muslims out of Madurai.
- C) A prophecy has shown that the king will conquer the Madurai Sultanate.
- D) The king should establish victory pillars after his conquest.

to describe the conquest of Madurai, it is likely that the story is intended to illustrate that the kings of Vijayanagara received their authority and legitimacy directly from divine sources.

28. THE CONSTELLATION HERCULES, NAMED AFTER AN ANCIENT GREEK MYTHICAL HERO. PAGE FROM A 1430 COPY OF THE BOOK OF FIXED STARS, AN ASTRONOMY BOOK WRITTEN BY A TENTH-CENTURY MUSLIM SCIENTIST

D) fragmentation of the Abbasid Caliphate

Correct. The Abbasid Caliphate began disintegrat-

This copy of The Book of Fixed Stars was made for the ruler of the Timurid dynasty, a Turkic state that controlled much of Central Asia during the fifteenth century. The dots scattered across the figure indicate individual stars and the symbols next to the dots indicate the stars' relative brightness, as observed by Muslim astronomers.

The sponsoring of scholarship by Turkic dynasties, such as the Timurids, best shows that, in the period circa 1200-1450, scholarly activities in the Muslim world continued despite the

- A) conquest of Baghdad by the European Crusaders
- B) expansion of the Song dynasty into Muslim Central Asia
- C) Byzantine reconquest of Palestine and Lebanon
- D) fragmentation of the Abbasid Caliphate

ing in the ninth and tenth centuries, and numerous new states emerged. Like the Abbasid caliphs, these states promoted the study of science and philosophy and the development of new technologies.

29. THE CONSTELLATION HERCULES, NAMED AFTER AN ANCIENT GREEK MYTHICAL HERO. PAGE FROM A 1430 COPY OF THE BOOK OF FIXED STARS, AN ASTRONOMY BOOK WRITTEN BY A TENTH-CENTURY MUSLIM SCIENTIST

This copy of The Book of Fixed Stars was made for the ruler of the Timurid dynasty, a Turkic state that controlled much of Central Asia during the fifteenth century. The dots scattered across the figure indicate individual stars and the symbols next to the dots indicate the stars' relative brightness, as observed by Muslim astronomers.

Muslim scholars' incorporation of cultural and intel-

D) Muslim states and empires were central to the processes of intellectual transfer in Eurasia

Correct. Through their sponsorship of scholarly and scientific pursuits, Muslim states and empires served as a vital link for the transfer of knowledge in Afro-Eurasia in the period before 1450. The work of Muslim scientists was essential both in the

Intellectual influences from pre-Islamic societies can best be used as evidence that

- A) most educated Muslims continued to speak European languages well into the fifteenth century
- B) European merchants had established trade outposts throughout Muslim Central Asia
- C) Muslim scientists rejected the contributions of scientists from other cultures as heretical
- D) Muslim states and empires were central to the processes of intellectual transfer in Eurasia

transmission of knowledge from the ancient world and to the geographic transfer of science and technology between western, eastern, and southern Eurasia.

30. THE CONSTELLATION HERCULES, NAMED AFTER AN ANCIENT GREEK MYTHICAL HERO. PAGE FROM A 1430 COPY OF THE BOOK OF FIXED STARS, AN ASTRONOMY BOOK WRITTEN BY A TENTH-CENTURY MUSLIM SCIENTIST

This copy of The Book of Fixed Stars was made for the ruler of the Timurid dynasty, a Turkic state that controlled much of Central Asia during the fifteenth century. The dots scattered across the figure indicate individual stars and the symbols next to the dots indicate the stars' relative brightness, as observed by Muslim astronomers.

Muslim scientists in the period before 1450 c.e. generally participated in intellectual and scholarly exchanges with neighboring cultures by

- A) being the recipients of funding from foreign rulers
- B) serving strictly as copyists of earlier works that otherwise would have been lost
- C) expanding upon the legacy of earlier scientific

C) expanding upon the legacy of earlier scientific works by conducting their own research

Correct. In astronomy, as in other sciences and intellectual pursuits, Muslim scholars elaborated and expanded upon ancient Greco-Roman, South Asian, and East Asian intellectual traditions by conducting their own original scientific research and including their own observations.
